Features

- **Interactive Financial Courses:** From budgeting basics to advanced investment strategies, we've got you covered.
- **Budget Tracker:** Effortlessly track your spending and savings in real-time.
- **Goal-Oriented Learning:** Set financial goals and follow personalized learning paths.
- **Fade-in animations:** for smooth user experience.
- **Mobile menu toggle:** for a clean and responsive interface.
- **Notifications & Alerts:** Get reminders to stay on top of your financial goals and habits

Tech Stack

- **Frontend:** HTML5, CSS3, JavaScript
- **Backend:** Node.js, Express
- **Database:** MongoDB
- **Frameworks/Libraries:** React, Angular
- **API Requests:** Fetch API for communication between frontend and backend

How to Install

To get the app up and running locally, follow these steps:

1. Clone the repository:
2. Navigate to the backend directory and install the dependencies:

```
bash  
npm install
```

3. To start the backend server, run:

```
bash  
node server.js
```

4. Open index.html in your browser to view the application.

Backend Setup

- The backend is a **Node.js** server using **Express**.
- It serves static files from the public directory (HTML, CSS, JavaScript).
- The backend also provides an **API endpoint** to fetch financial data (/api/data).

How to Use

1. **Sign Up:** Create an account and set your financial goals.
2. **Learn:** Explore our courses and resources tailored to your needs.
3. **Track:** Monitor your budget and savings with the integrated tools.
4. **Grow:** Set investment targets and take the next step towards financial freedom.

Contributing

We welcome contributions to make **WealthWhiz** even better.

To contribute:

1. Fork the repository.
2. Clone your forked repository to your local machine.
3. Create a new branch for your feature or bug fix.
4. Push your changes to your forked repository.
5. Open a pull request for review.
